

### **Abstract**

This is a simple paragraph at the beginning of the document. A brief introduction about the main subject.

After our abstract we can begin the first paragraph, then press "enter" twice to start the second one.

This line will start a second paragraph

I will start the third paragraph and then add  
a manual line break which causes this text to start on a new line but remains part of the same paragraph. Alternatively, I can use the `\newline` command to start a new line, which is also part of the same paragraph.
